## System Builder Certification Guide

In order to receive NVIDIA Business Platform certification, the System Builder must complete the following actions:

### System Builder Actions

- ❑ Review and sign NVIDIA Business Platform Logo License Agreement
- ❑ For each candidate system SKU for certification, perform the system self-certification with the NVIDIA Business Platform Compliance Analyzer and then provide the self-certification report to NVIDIA for inspection. The Compliance Analyzer must be run in stress mode with the following command:

```
C:\Program Files\NVIDIA Corporation\NVIDIA Business Platform  
Compliance Analyzer> nCheck.exe /stress
```

The self-certification testing must be performed using production hardware and software. Note that NVIDIA does not require system builders to run every single system built through the Compliance Analyzer, only a representative production unit for each SKU to be sold.

- ❑ For each candidate system SKU for certification, complete the *NVIDIA Business Platform Certification Candidate Fact Sheet* form below
- ❑ Submit the signed NVIDIA Business Platform Logo License Agreement, NVIDIA Business Platform Compliance Analyzer report(s), and NVIDIA Business Platform Certification Candidate Fact Sheet(s) to the following address:

  - Official NVIDIA Business Platform logo and artwork along with usage guidelines
  - Web assets including template product pages
  - Sales training materials
