(**High Performance, Gaming**) NVIDIA nForce® 570 SLI™ media and communications processors (MCPs) were designed with the gamer in mind. NVIDIA® SLI™ technology allows you to combine two NVIDIA® GeForce® graphics cards for scalable graphics performance. Store and protect your priceless media files across larger RAID volumes with NVIDIA MediaShield™ technology and prioritize your online gaming traffic with NVIDIA FirstPacket™ technology. Rule the gaming world and become the 'King of Ping' with an NVIDIA nForce 570 SLI MCP.

100 Words
(**High Performance, Gaming**) NVIDIA nForce® 570 SLI™ media and communications processors (MCPs) were designed with the gamer in mind. NVIDIA® SLI™ technology allows you to combine two NVIDIA® GeForce® graphics cards for scalable graphics performance. Send files to your friends while gaming with NVIDIA FirstPacket™ technology which prioritizes your online gaming traffic, making you the 'King of Ping'. In addition, NVIDIA MediaShield™ technology helps you store and protect your priceless media files across up to six SATA drives in a massive RAID array. Configure your system for extra disk performance, more data redundancy or both. Rule the gaming world with NVIDIA nForce 590 SLI MCP.
