

## NVIDIA nForce 500 Series Copy Blocks

### 10 Words

**(500 Series family)** Run faster with NVIDIA nForce® 500 Series media and communications processors (MCPs).

### 25 Words

**(500 Series family)** NVIDIA nForce® 500 Series media and communications processors (MCPs) deliver innovate, high-performance solutions for creating a wide range of AMD-based discrete PC platforms.

### 50 Words

**(500 Series family)** NVIDIA nForce® 500 Series media and communications processors (MCPs) deliver a complete range of high-performance solutions for AMD-based discrete platforms. Packed with innovative features such as NVIDIA® SLI™, LinkBoost™, MediaShield™, FirstPacket™, and DualNet® technologies, NVIDIA nForce 500 Series MCPs include the right features and software for today's PCs – from mainstream to enthusiast.

### 75 Words

**(500 Series family)** NVIDIA nForce® 500 Series media and communications processors (MCPs) deliver a complete range of solutions for AMD-based discrete platforms. Performance-enhancing features include NVIDIA® LinkBoost™ technology to automatically increase bus speeds and NVIDIA SLI™ technology for scalable graphics performance. With NVIDIA MediaShield™ storage technology, you can easily set up and configure up to six SATA drives for even higher performance and security. NVIDIA FirstPacket™ technology prioritizes network traffic for more responsive online gaming and NVIDIA DualNet® technology doubles your network connectivity options.
